PROJECTS

Scalable Web3 SaaS Platform with Solana and Next.js Integration　　Ongoing
A Web3 SaaS platform leveraging S3 for scalable storage, Next.js for a seamless frontend, Solana for fast blockchain transactions, and Web3.js for decentralized Web3 interactions. The goal is to create a user-friendly, efficient solution that simplifies access to the Web3 ecosystem.

AIDA
Artificially Intelligent Digital Assistant
This project focuses on creating a scalable and intelligent chatbot that can seamlessly integrate with existing customer service platforms. AIDA is designed to handle a wide range of l queries, from simple FAQs to more complex issues, while continuously learning and improving from each interaction.

Weather Application
Developed a weather application that provides real-time weather updates, forecasts, and alerts using APIs. The app features a user-friendly interface with location-based weather tracking, including temperature, humidity, wind speed, and customizable notifications.

Portfolio Website
Designed and developed a personal portfolio website to showcase projects, skills, and experience. The website features a clean, responsive layout optimized for both desktop and mobile devices, highlighting key accomplishments with interactive project demos, an integrated blog, and contact form."
